Chile, as it has done every year, informed the SPRFMO Scientific Committee (SC) through the National Report the results of the investigations regarding Chilean Jack Mackerel. Among other matters, the information submitted referred to: i) Fishery Monitoring; ii) Bycatch Research and Monitoring Program for Jack Mackerel; iii) Hydroacoustic assessment of Jack mackerel between Arica-Parinacota and Valparaíso Regions, 2024; v) Assessment of the total allowable catch; and vi) Population Genetics of Chilean Jack Mackerel in the South Pacific Ocean.

Additionally, the following studies (working papers) were submitted to the SC:

- SC13-JM02 *Update on CPUE standardization for the Chilean jack mackerel fishery in central-southern Chile using spatio-temporal Bayesian models*
- SC13-JM03 *Spatio-temporal dynamics of the jack mackerel fishery off south-central Chile in 2025*

- Have you informed the Secretariat about conservation and management measures in effect for *T. murphyi* within your national jurisdiction areas (e.g., TAC resolutions)?

YES NO *Provide notification date*

Comments: The national Chilean regulation, as has been explained in reports from previous years, is based mainly on the General Law on Fisheries and Aquaculture. This law establishes the decision-making process for fisheries measures, instituting not only Technical Scientific Committees (scientific advice) but also Technical Committee (body that brings together the different stakeholders). In addition, the law indicates in article 7E the process by which the CMMs adopted within the framework of international treaties that Chile is part of are applicable to the entire fleet and national activity. The foregoing materialized through a resolution (1304 of 2025) of the fishing authority that introduces measures into the internal legal system in Spanish and that is published not only in the Chilean Official Gazette, but also on its website. Then, the SPRFMO Secretariat shares this resolution on its website for those who need to see it in Spanish. All SPRFMO measures fully apply to the Chilean fleet in the Convention Area. In particular, CMM 01-2025 is not only applied in the aforementioned area, but also in the Chilean EEZ.

Additionally, in 2024 (December), Chile issued the Exempt Decree No. 213 of 2024 of the Ministry of Economy, Development and Tourism, which set the provisional regime for all Chilean operations conducted on jack mackerel. Following the adoption of CMM 01-2025 by the SPRFMO Commission, the national TAC for 2025 was established at 1,024,650 tons through Exempt Decree No. 94 of 2025.

NO

Para 27-28: Are you a coastal State that has **NOT** given your express consent under Article 20 paragraph 4(a)(ii) of the Convention?

YES *Enter relevant details here*

NO

- If YES, did you submit to the Secretariat a report explaining to the Commission how the national measures concerning the *T. murphyi* fishery in areas under your national jurisdiction are compatible with those adopted by the Commission?

YES *Enter submission date*

NO

NO *Resolution Ex. 1304 dated May 22, 2025, of the fisheries authority approved the conservation and management measures adopted by the commission, and introduced them into the domestic legal system in Spanish and which is published not only in the Official Gazette, but also on its website. Then, and for the SPRFMO Secretariat to share this resolution on its website for those who need to view it in Spanish. All SPRFMO measures fully apply to our fleet, the Chilean fleet in the Convention Area and in particular, 01-2025 not only in the aforementioned area, but in our own EEZ.*

Enter relevant details here or provide information as separate attachment

Regarding the methods used by Chile to prevent tampering of ALCs on individual vessels and among others, we are able to mention, that seals are installed to prevent tampering. For this purpose, every time a vessel requires adding or changing equipment, this must be installed by an inspector from the Chilean maritime authority. In addition, every time a vessel is inspected, it is verified that the Security features are in place, including the verification of numbered equipment and seals.

Moreover, before the equipment is acquired, it must be certified. This includes, inter alia, having a series of alarms, whether it is for box opening, antenna blocking, and device turning on and off. After several tests, the respective vessel obtains such authorization through a resolution of the General Directorate of the Maritime Territory and Merchant Marine.

Para 19: Please provide the following information for each vessel flying your flag and reporting to the SPRFMO VMS (*Enter relevant details below or provide information as separate attachment*)

Vessel Name	Vessel IMO	Call sign	ALC Brand	ALC model	ALC identification	Security features
